

Long Screw Bend - 360° Inspection & Sorting Machine

M4 ~ M8 x 60 ~ 100mm
(M10 ~ M14 x 100 ~ 250mm)

100~200 ppm
(20~30 ppm when using rotation mechanism)

Target Work :

M4 - M8, Shank Length: 60 - 100mm

Inspection Options:

Upper Camera:

- Scratch & Head Shape Inspection
- Head Diameter

Lateral Camera:

- Head height (thickness)
- 360° Inspection of Side of Head
- 360° Inspection of Scratches or Dents on the Shaft (Including Threaded Portion)
- 360° Inspection of Shaft & Tip Shape

Laser Sensor

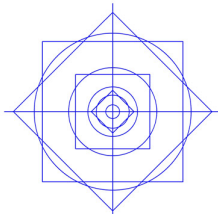

- Length Inspection of Shank

Contact Displacement Sensor

- Inspection of Bent Area of Shank

※ Precise Preset Counter (6 Digits)

- ① Diameter and head shape inspection camera.
- ② Head and side inspection camera.
- ③ 360° scan camera to inspect tip shape, shank & lower shaft areas.
- ④ Shank & bent area of shaft inspection by rotation mechanism.
- ⑤ Shank length dimension inspection by laser sensor.
